6. **An agency's justification and reason why a rule should be made, amended, repealed, or renumbered, to include an explanation about the rulemaking:**  

An exemption from Executive Order 2015-01 was provided for this rulemaking by Ted Vogt, Chief of Operations in the Governor's office, in an e-mail dated July 29, 2015.

The Arizona Game and Fish Commission proposes to amend its Article 8 rules, governing wildlife areas and other Department-managed properties, to enact amendments developed during the preceding Five-year Review.

Under Title 41, Chapter 6, pursuant to section 41-1005(A)(1) the Commission has the authority to pursue exempt rulemaking to related to the use of public works under the jurisdiction of an agency when the effect of the order is indicated to the public by means of signs or signals. Public works means public facilities and improvements financed by the government for the public good. Wildlife areas are comprised of lands owned or leased by the Commission, federally-owned lands of unique wildlife habitat where cooperative agreements provide wildlife management and research implementation, and any lands with property interest conveyed to the Commission through an approved land use agreement, where said property interest is sufficient for management of the lands consistent with the objectives of the wildlife area. Wildlife areas are intended to conserve and protect wildlife and to provide public

recreational opportunities. Wildlife areas provide a benefit to the general public by providing quality space for people to recreate and, when authorized by Commission Order, hunt and fish. In addition, these activities and public visitation can draw people into local communities and businesses, positively impacting local economies. The proposed amendments are intended to promote and maintain public safety and protect and enhance Arizona's diverse wildlife.

For R12-4-801 General Provisions, the objective of the rule is to establish the purposes for wildlife areas, to specify the types of Commission-owned or -managed property that may be designated as a wildlife area, and to notice the public of restrictions that apply to each specific wildlife area. The rule provides protections to Commission-owned and -managed wildlife areas and other properties, while maximizing public access and use of the same properties. Wildlife areas are intended to conserve and protect wildlife and provide public recreational opportunities; regulations and restrictions are developed through a public process. Other types of properties, such as the headquarters facility and regional offices, are typically used to conduct Department business and are not directly used for public recreation. The Commission proposes to amend R12-4-801 to separate wildlife areas and other types of properties to increase clarity and make the rule more concise. The rule is also amended to state the Department may post signs that place additional restrictions on the use of wildlife areas, which may include the timing, type, or duration of certain activities, including the prohibition of access or nature of use. In addition, the Commission proposes to repeal subsection (C) as it was originally written to provide assurance that a wildlife area designation would not be used solely to protect private property. This is no longer a concern given the Commission's thorough review process applied to all prospective property acquisitions.

For R12-4-802. Wildlife Area and Other Department Managed Property Restrictions, the objective of the rule is to establish the restrictions applicable to the use of wildlife areas and other Commission property. The rule provides protections to Commission-owned and -managed wildlife areas and other properties, while maximizing public access and use of those properties. Wildlife areas are intended to conserve and protect wildlife and to provide public recreational opportunities. Wildlife areas are comprised of lands owned or leased by the Commission, federally-owned lands of unique wildlife habitat where cooperative agreements provide wildlife management and research implementation, and any lands with property interest conveyed to the Commission through an approved land use agreement, where said property interest is sufficient for management of the lands consistent with the objectives of the wildlife area. Wildlife areas provide a benefit to the general public by providing quality space for people to recreate and, when authorized by Commission Order, hunt and fish. In addition, these activities and public visitation can draw people into local communities and businesses, positively impacting local economies. The Commission proposes to amend R12-4-802 to increase consistency between wildlife areas regarding camping, travel, and closure dates; ensure public safety; and remove restrictions where possible to reduce the burden on the public and the Department.

For R12-4-803. Wildlife Areas and Other Department Managed Property Boundary Descriptions, the objective of the rule is to provide the legal boundary descriptions for wildlife areas and Department Controlled properties. The Commission proposes to amend R12-4-803 to increase consistency in language and format between all wildlife boundary descriptions and reflect current wildlife boundary descriptions for properties acquired and sold by the Commission.

The Commission has determined the probable benefits of the rules within this state outweigh the probable costs of the rulemaking and, once the proposed amendments indicated in this rulemaking are made, the rules will impose the least burden and costs to persons regulated by Article 8 rules, including paperwork and other compliance costs necessary to achieve the underlying regulatory objective.

**7. A reference to any study relevant to the rule that the agency reviewed and proposes to either rely on or not rely on in its evaluation of or justification for the rule, where the public may obtain or review each study, all data underlying each study, and any analysis of each study and other supporting material:**

The agency did not rely on any study in its evaluation of or justification for the rules.

**8. A showing of good cause why the rule is necessary to promote a statewide interest if the rulemaking will diminish a previous grant of authority of a political subdivision of this state:**

Not applicable

**9. The summary of the economic, small business, and consumer impact, if applicable:**

Exempt under A.R.S. § 41-1005(A)(1).

**10. A description of the changes between the proposed rules, including supplemental notices, and the final rulemaking package (if applicable):**

The draft Notice of Exempt Rulemaking, published on the Department's Portal, included restrictions and boundary descriptions for the newly acquired Planet Ranch Wildlife Area. The newly acquired property is not available for public use at this time, so the Commission removed the proposed restrictions and boundary descriptions for the Planet Ranch property. The Commission intends to incorporate restrictions and boundary descriptions for the Planet Ranch property in a future exempt rulemaking.

**11. A summary of the public stakeholder comments made about the rulemaking and the agency response to the comments, (if applicable):**

**Written Comment: February 18, 2016.** I briefly scanned the draft rules for wildlife and Commission owned properties and have a question about “other” activities, like livestock grazing or habitat improvement projects, that might occur or are currently occurring on some of these lands. Maybe these uses are dealt with elsewhere in rule? The reason I ask is that I have been involved with the formation and roll out of a relatively new conservation/environmental nonprofit organization over the last couple of years and we have had some discussions with the agency and Commissioners about cooperating with the Commission in the management of some of the properties, particularly with those that may benefit from enhanced range management or habitat improvement planning and implementation. Some of the Commission owned properties are grazed by livestock and some may provide opportunities to implement habitat improvement activities in cooperation with other state and federal agencies. The root of my inquiry is that it appears the rules are silent on livestock grazing and potential implementation of management plans and projects, which all might impact the public’s understanding of the variety of “other uses” they may encounter and may impact their use and enjoyment at certain periods of time. The existing closure language will probably suffice for many projects, but there may be special management that doesn’t quite fit with the historical uses (like the only way to get rid of a noxious weed is to use chemicals and the restrictions need to be different; like don’t drink the water. I only use that example as it popped into my head, I have no knowledge of any plan to use chemicals on any Commissioner owned land). I don’t have concrete examples of future projects I can provide the Department with as we are still in the preliminary discussion phase, but since these rules may be in place before we have concrete examples, it seems like there might be a need to forecast the activities that might be authorized by the Commission and make note of them in the rules rather than amend the rules later. Similarly, if livestock grazing is occurring, I would guess there may need to be restrictions about interaction with livestock and range improvements that should be mentioned. Or, as stated earlier, maybe the Department handle these types of uses elsewhere.

**Agency Response:** Wildlife area rules are intended to manage public recreational use and do not regulate resource management by the agency. Placing specific restrictions and closures in rule occurs only when the restrictions becomes permanent and/or is unusual. Resource management programs and activities are directed through Wildlife Area Management Plans, which are operational in nature and not regulatory. Livestock grazing activities are addressed through management plans, which are developed in accordance with the guidance provided by Commission Policy A2.2 Land Use Agreements on Commission Properties. The commenter is correct that most regulatory needs are addressed through the generic authority to manage and regulate public uses through the use of signs. The Department wishes to maintain flexibility that allows the Department to protect resources and public safety while balancing, to the maximum extent possible, public use. As many of the issues the commenter describes may occur in the future and because Article 8 is an exempt rule the Department is able to review and make such changes when they become necessary on an annual basis rather than waiting for the next five-year review or going through the regular rulemaking process.

**12. Any other matters prescribed by statute that are applicable to the specific agency or to any specific rule or class of rules. Additional matters include but are not limited to:**

**a. Whether the rule requires a permit, whether a general permit is used, and if not, the reason why a general permit is not used:**

The rule does not require the issuance of a regulatory permit, license, or agency authorization.

**b. Whether a federal law is applicable to the subject of the rule, whether the rule is more stringent than federal law, and if so, citation to the statutory authority to exceed the requirements of federal law:**

Federal law is not applicable to the subject of the rule.

**c. Whether a person submitted an analysis to the agency that compares the rule’s impact on the competitiveness of business in this state to the impact on business in other states:**

The agency did not receive an analysis.

**13. A list of any incorporated material and its location in the rule:**

Not applicable

**14. Whether the rule was previously made, amended, repealed, or renumbered as an emergency rule? If so, shall state where the text changed between the emergency and exempt rulemaking packages:**

The rule was not previously made, amended, repealed, or renumbered as an emergency rule.

**15. The full text of the rules follows:**

**6. An agency's justification and reason why a rule should be made, amended, repealed, or renumbered, to include an explanation about the rulemaking:**

**Summary.**

The Arizona Department of Environmental Quality (ADEQ) is amending the state's Agricultural Best Management Practice rules in Title 18, Chapter 2, Article 6 of the Arizona Administrative Code. This action adds a management practice recently adopted by the Governor's Agricultural Best Management Practices Committee for the Maricopa County areas designated as moderate and serious nonattainment for particulate matter (PM) under the Clean Air Act. This rulemaking adds an additional option for farmers when seeking to mitigate the emission of fugitive dust during the course of animal waste handling activities. The new practice applies only to commercial poultry farms and allows facilities to use a rotary dryer when fulfilling its BMP obligations for handling and transporting animal waste.

**Background.**

**Governor's Agricultural Best Management Practices Committee**

The Governor's Agricultural Best Management Practices Committee (Committee) was created by law in 1998 to address agriculture's contribution to emissions of PM in areas designated as nonattainment under the Clean Air Act. A.R.S. 49-457. The Committee is composed of five local farmers, the director of ADEQ, the director of Arizona's Department of Agriculture, the state conservationist for the Natural Resources Conservation Services, the vice dean of the University of Arizona College of Agriculture and Life Sciences, and a soil scientist from the University of Arizona.

The Committee is responsible for developing and adopting best management practices (BMPs) to be implemented by those engaged in regulated agricultural activities in areas designated as moderate and serious nonattainment for PM with an aerodynamic diameter less than or equal to ten micrometers. Farming operations subject to the BMP regulations are not required to implement every practice listed in the rules. Rather, each farmer picks from a list of practices, one or two (depending on the area's attainment designation) in the applicable categories that it will implement to achieve reductions in PM emissions.

Following adoption of a BMP by the Committee, ADEQ is required to complete an exempt rulemaking action to update the agricultural regulations in the AAC with the newly adopted BMP as approved by the Committee. H.R. 2208, 50th Leg., 1st Reg. Sess. (Ariz. 2011), ARS 49-457.

**Implementing the BMP Program**

The BMP program is largely divided into three categories of agricultural activities: crop operations, animal operations, and irrigation districts. Each respective category contains specific types of activities relevant to that category. For example, the commercial animal operation section is further divided into the following: commercial dairy operations, commercial beef feedlot, commercial poultry facility, and commercial swine facility. Each subcategory of activity within the category of farming (e.g., commercial poultry facilities within the animal operations category) lists actions that the owner or operator of the facility can choose to implement to reduce PM emissions that occur during the course of regular farming activity. The actions, or BMPs, available to farmers are listed under Title 18, Chapter 2, Article 6 of the Arizona Administrative Code.

Depending on the area's air quality designation by the Environmental Protection Agency for the criteria pollutant PM, a farmer may be required to implement either one or two of the BMPs when performing regulated agricultural activities. *See generally* R18-2-610 through R18-2-613. Regulated agricultural operations located in a moderate nonattainment area must implement and maintain at least one BMP listed in the regulations. ARS 49-457(H). Regulated agricultural operations located in serious nonattainment areas must implement and maintain at least two BMPs that have been approved and codified in the regulations. *Id.*

**Committee's Adoption of a New BMP**

On January 14, 2016, the Governor's Agricultural Best Management Practices Committee (Committee) approved a new BMP in the animal waste handling and transportation category for commercial poultry farmers in Maricopa County PM nonattainment areas. The Committee adopted a BMP allowing the use of a rotary dryer to dry chicken manure prior to transportation in R18-2-611.01(D) (2). It also adopted an accompanying definition in R18-2-611(4) outlining the requirements that accompany the use of a rotary dryer in the facilities waste handling operations.

**Technical Changes**

In addition to the rule amendments discussed above, ADEQ identified technical issues with the language of R18-2-611.01 that needed to be addressed in order to ensure consistency with the authorizing statute (A.R.S. 49-457) and relevant sessions law (HB 2208).

**Section by Section Explanation of Proposed Rules:**

- R18-2-611 Amend the definitions of best management practices for commercial poultry facilities to include the use of a rotary dryer.
- R18-2-611.01 Amend to list of BMP options to include the use of a rotary dryer in the practices available to commercial poultry facilities when handling animal waste.
